# WATER COOLING

## Radiator Installation

### Step 1: Install fan

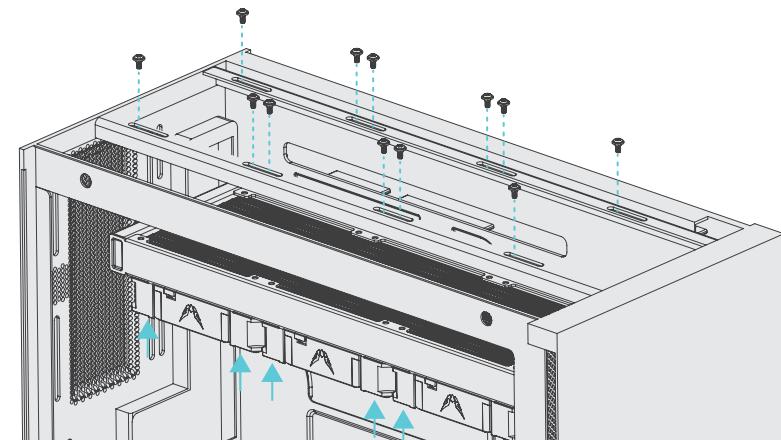

Use the fan screws to secure the fan to the radiator.

\*Please use the shorter fan screws. DO NOT use extended screws to secure the cooling fan.

### Step 2: Install radiator

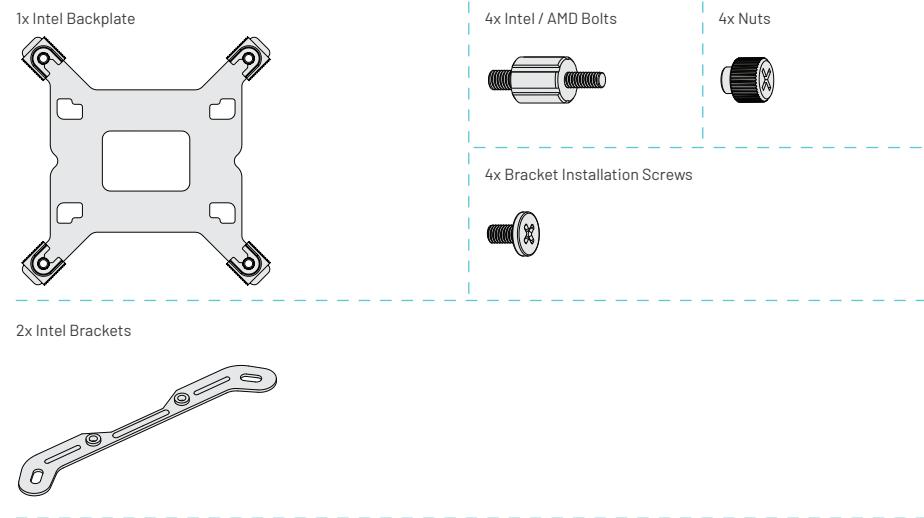

Use the radiator screws to secure the radiator to the case.

# EN Intel LGA1200/1700 Installation

EN

We have marked the parts required for installing the Intel LGA1200/1700 platform for you.

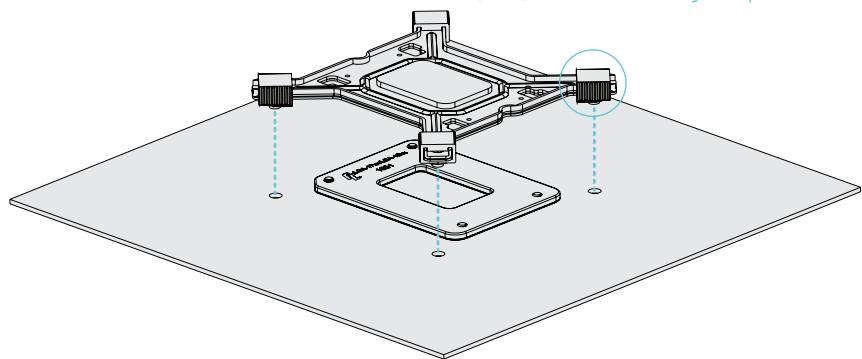

## Step 1: Install backplate

1. Align the backplate to the corresponding platform holes.
2. Install the backplate onto the back of the motherboard.

\* You may slide it to adjust for alignment with corresponding platform holes.

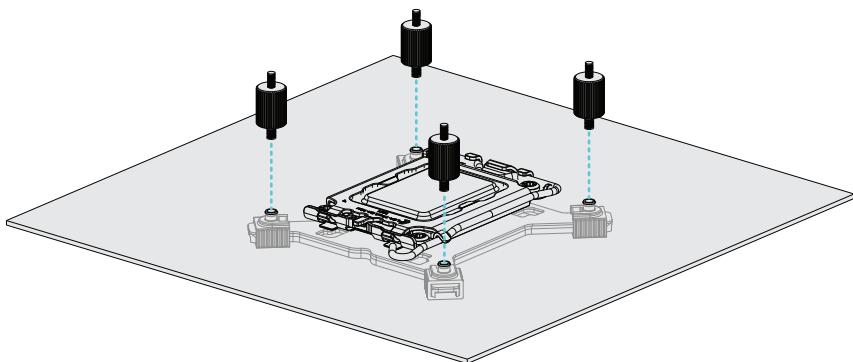

\* Use the inner mounting hole position for 1200 (115X) and outer mounting hole position for 1700.

## Step 2: Install screws

Install Intel/AMD bolts to the motherboard.

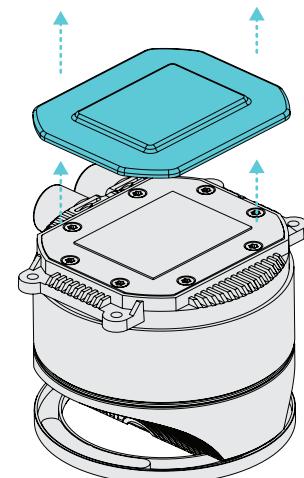

\*The larger end of the screw faces down.

## Step 3: Removing protective cover

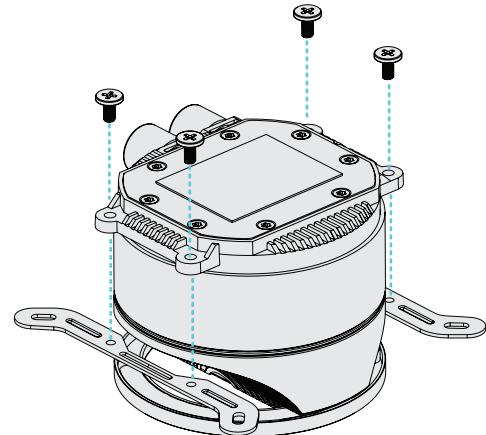

Remove the protective cover from coldplate.

\* it is critical to the cooling performance.

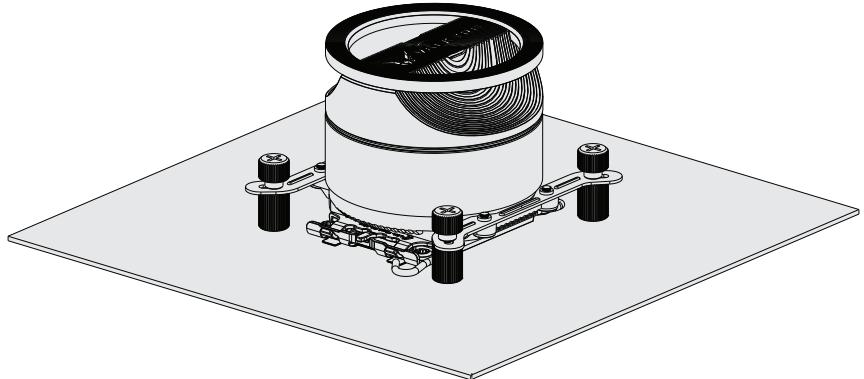

**EN Step 4: Install bracket**

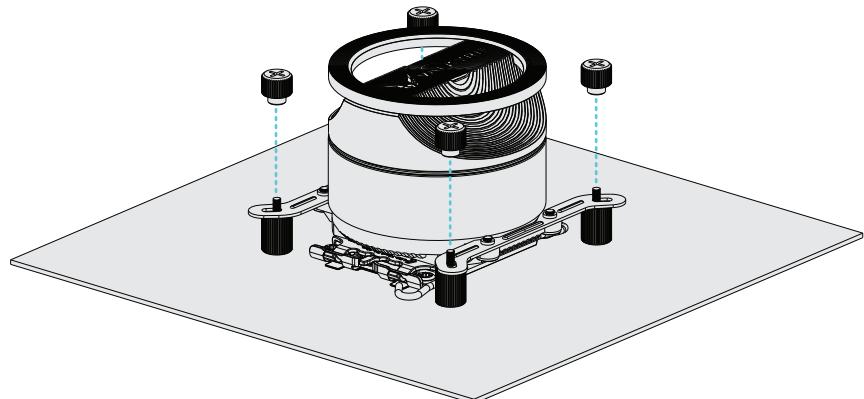

Use bracket bolts to install the bracket to the water block.

**Step 6: Complete installation**

Please refer to the "Wiring" for wiring.

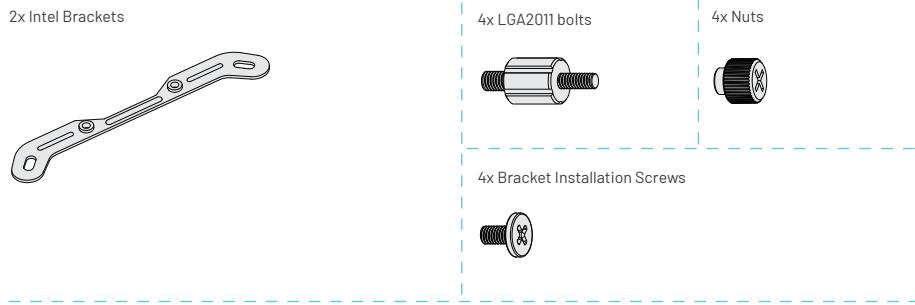

**Step 5: Install water block**

Put the water block onto the studs and use nuts to fix it.

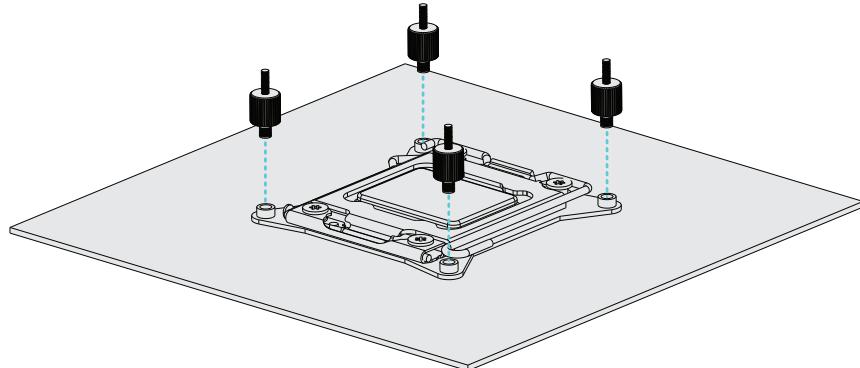

## EN Intel LGA2011/2066 Installation

We have marked the parts required for installing the Intel LGA2011/2066 platform for you.

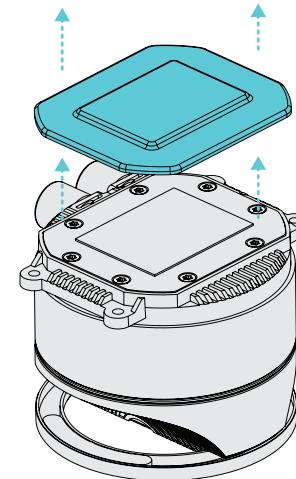

### Step 1: Install screws

Install Intel LGA2011 bolts to the motherboard.

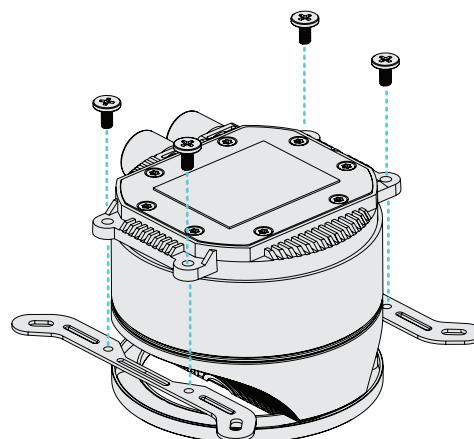

### Step 2: Removing protective cover

Remove the protective cover from the coldplate.  
\*It is critical to the cooling performance.

### Step 3: Install bracket

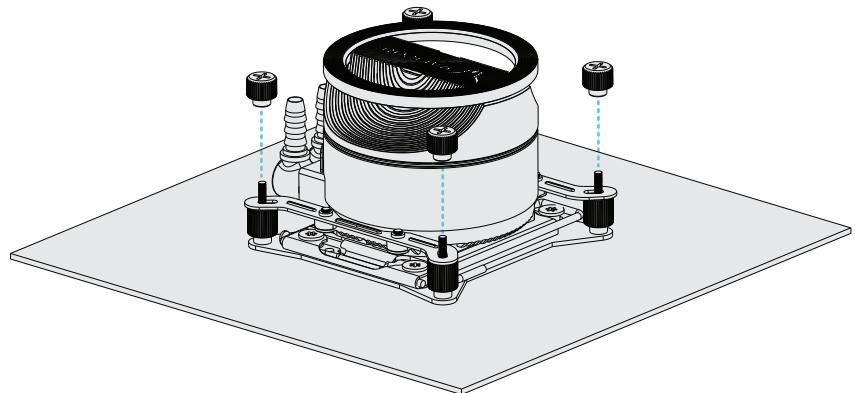

Use bracket bolts to install the bracket to the water block.

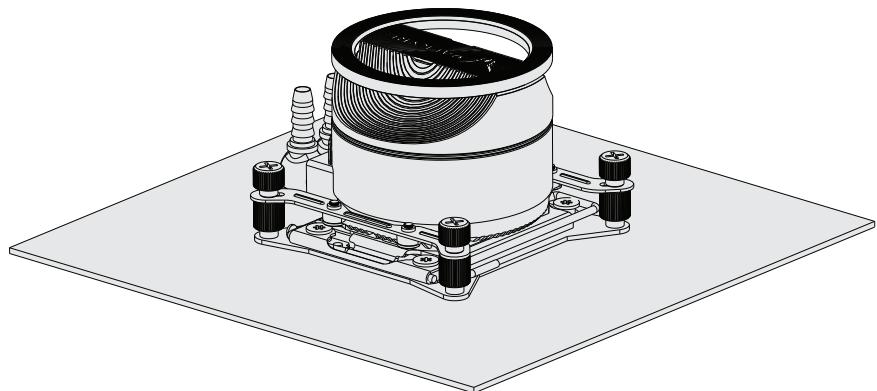

**EN Step 4: Install water block**

EN

Put the water block onto the studs and use nuts to fix it.

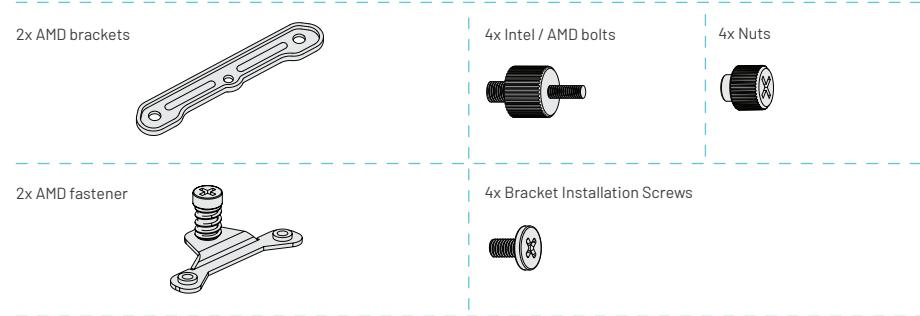

**Step 5: Complete installation**

Please refer to the "Wiring" for wiring.

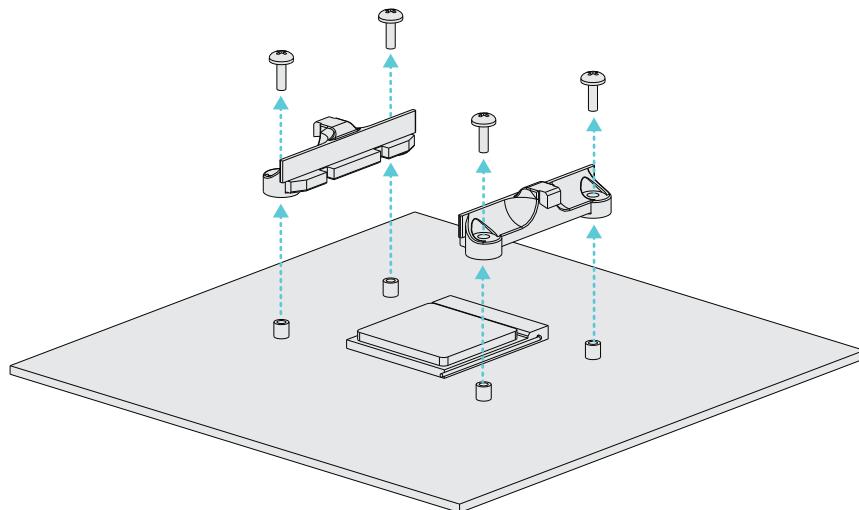

## EN AMD AM4/AM5 Installation

We have marked the parts required for installing the AMD AM4/AM5 platform for you.

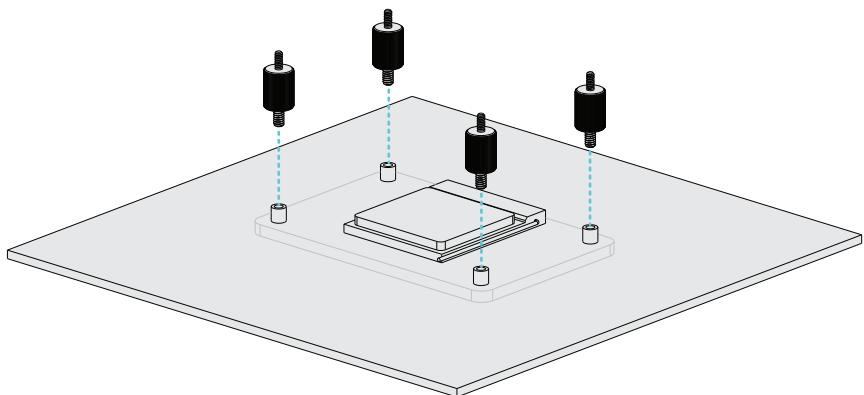

### Step 1: Prepare the motherboard

Screw out the 4 bolts. Remove the original bracket on the motherboard. Keep the original backplate.

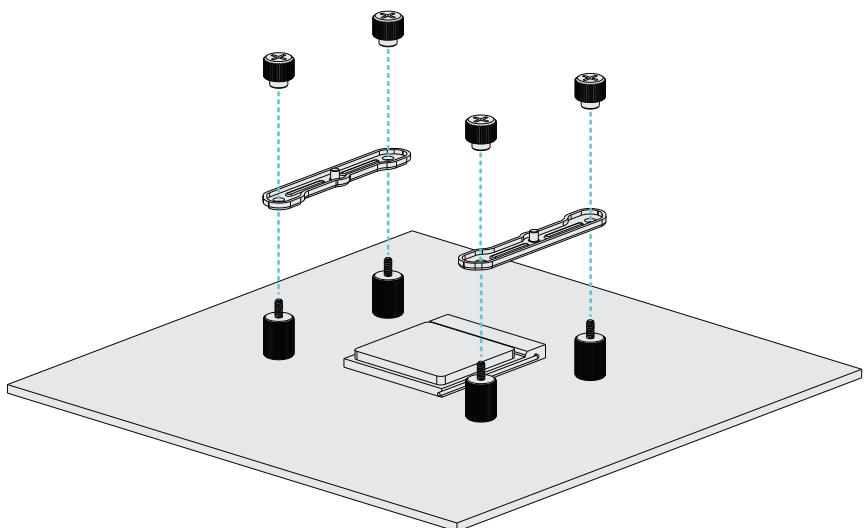

### Step 2: Install screws

Install Intel/AMD bolts to the motherboard.  
\*The larger end of the screw faces down.

### Step 3: Install brackets

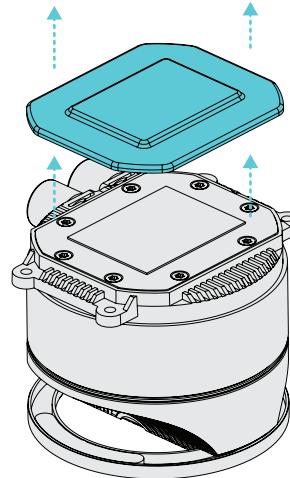

Install AMD brackets onto the screws and tighten them with nuts.

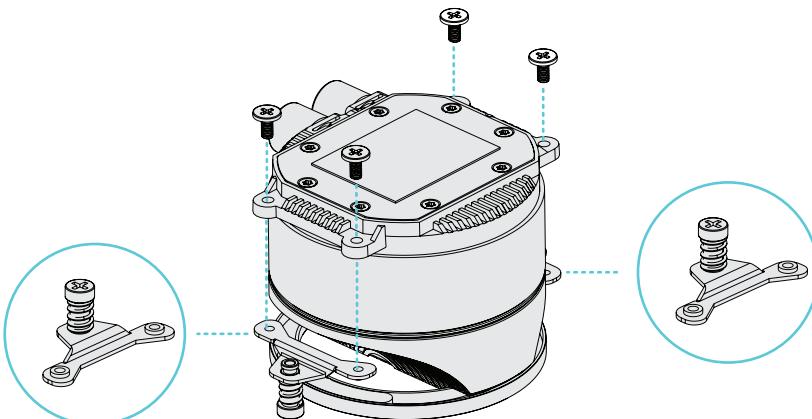

**EN Step 4: Removing protective cover**

Remove the protective cover from the coldplate.

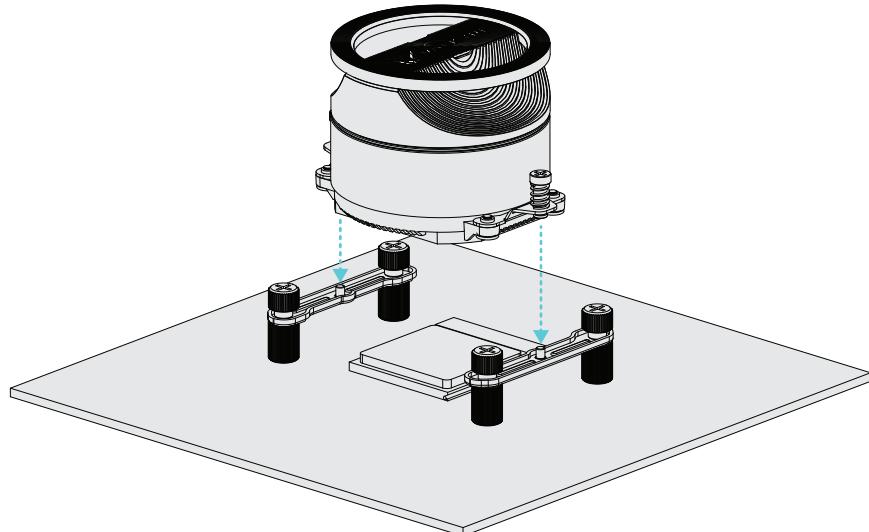

\*It is critical to the cooling performance.

**Step 5: Install AMD fastener**

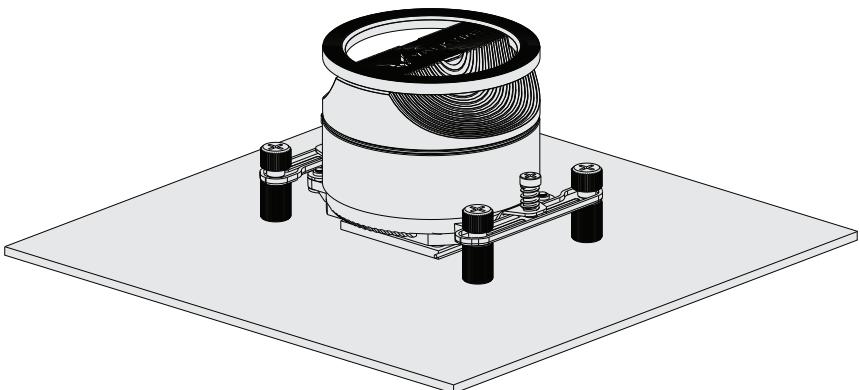

Use bracket bolts to install the AMD fastener to the water block.

**Step 6: Install Water Block**

Align bracket to the holes and tighten the spring screws on both ends.

**Step 7: Complete installation**

Please refer to the "Wiring" for wiring.

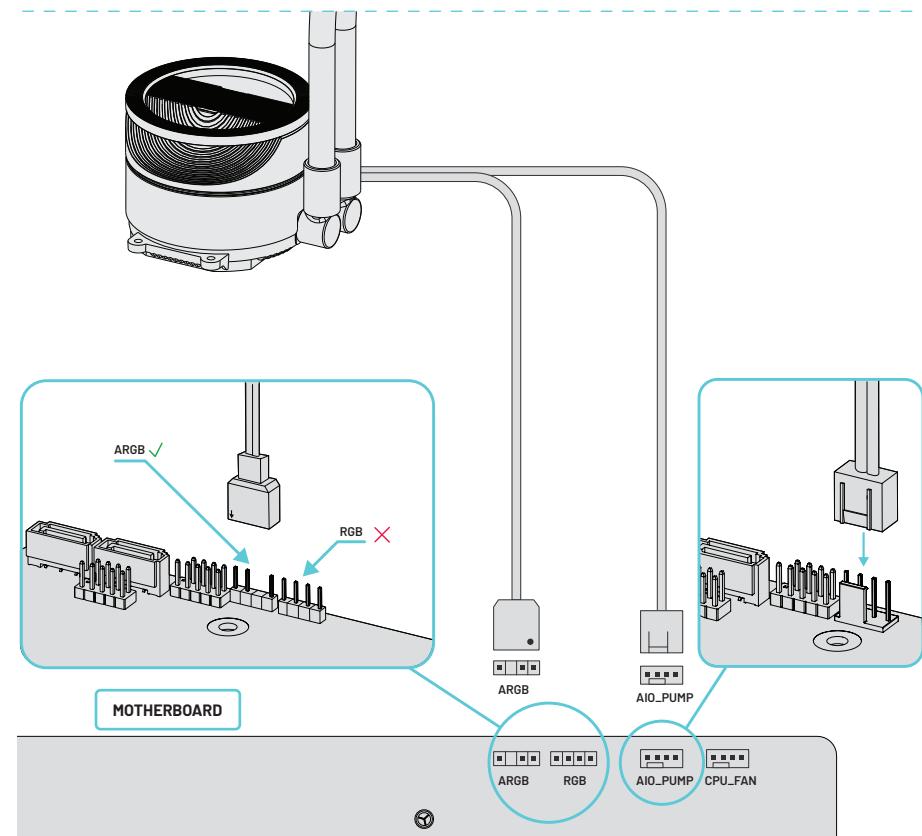

# WIRING

## Connecting Water Block to the Motherboard

1. Connect the water pump 4PIN connector into the AIO\_PUMP header on the motherboard.
2. Plug the water block A-RGB connector into the A-RGB header on the motherboard.

\* If there is only one A-RGB header on the motherboard, the water block A-RGB connector may be connected to the Valkyrie HUB.

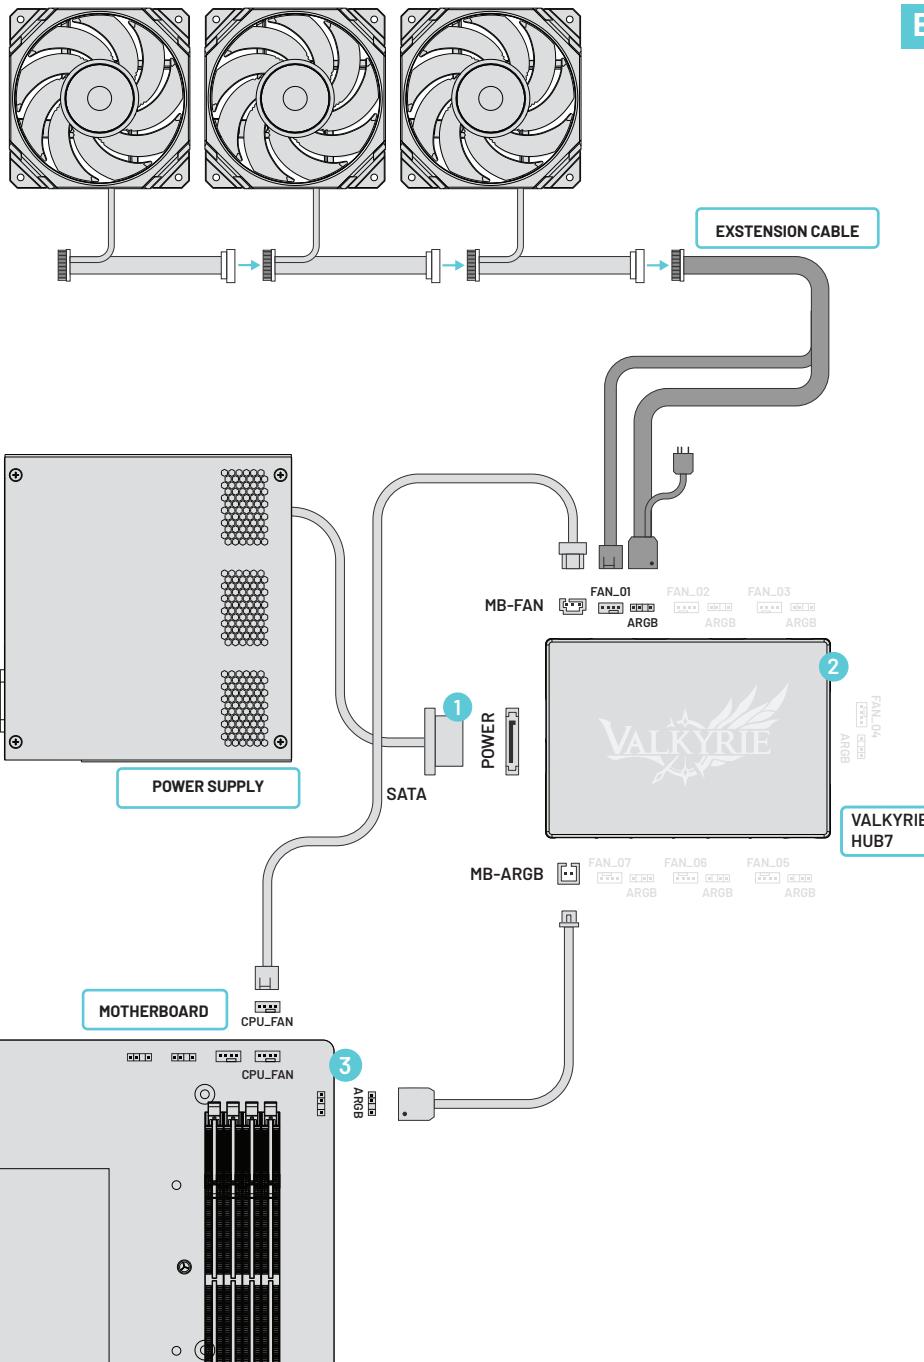

## EN Valkyrie HUB Wiring

EN

1. Plug the SATA power supply connector into the Valkyrie HUB POWER port.
2. Plug the 4PIN fan connectors and ARGB connectors into the Valkyrie HUB, respectively.\*
3. Connect Valkyrie HUB control cables to MB\_FAN and MB\_ARGB ports respectively and plug the other ends into the CPU\_FAN and ARGB headers on the motherboard.

\*The FAN\_01(red) on the VK HUB7 must be plugged in with a 4PIN fan connector.

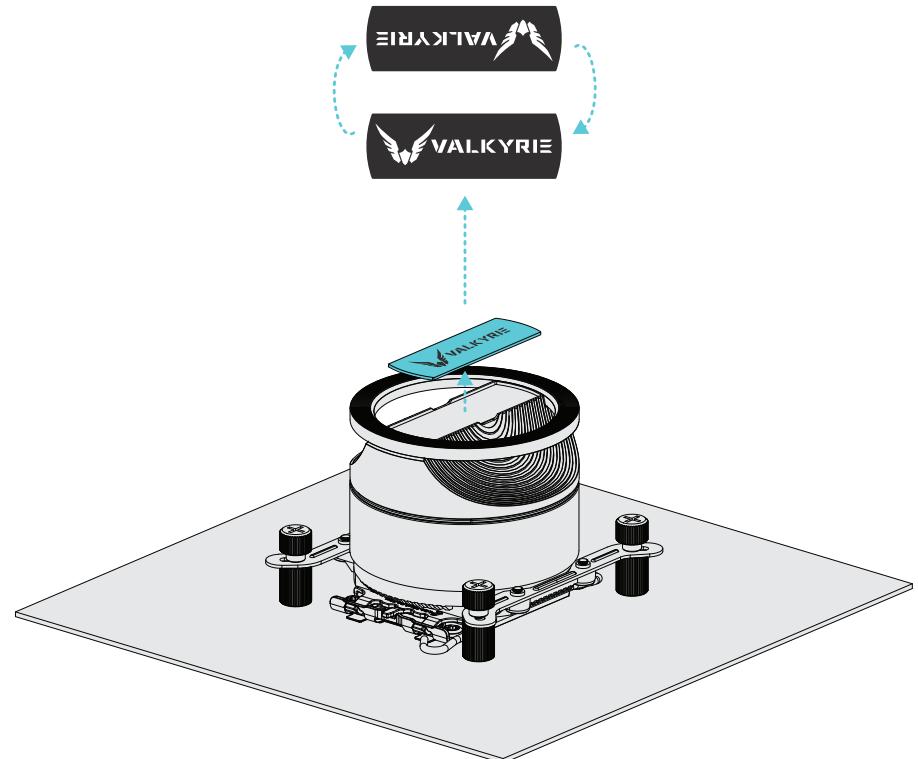

# TIPS

## Method of replacing water block logo

The nameplate can be removed by pulling up the middle section of the magnetic nameplate.

\*Make sure you start from the middle.

# WASSERKÜHLUNG

## Heizkörpermontage

### Schritt 1: Lüfter montieren

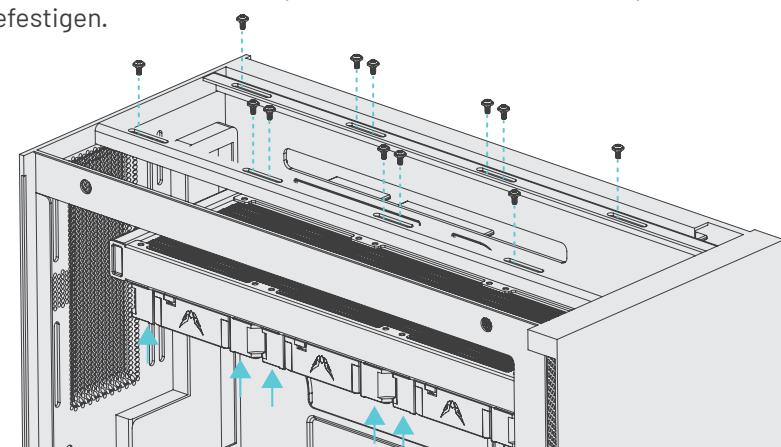

Verwenden Sie die Lüfterschrauben, um den Lüfter am Kühlkörper zu befestigen.

\*Bitte verwenden Sie die kürzeren Lüfterschrauben. Verwenden Sie KEINE verlängerten Schrauben, um den Lüfter zu befestigen.

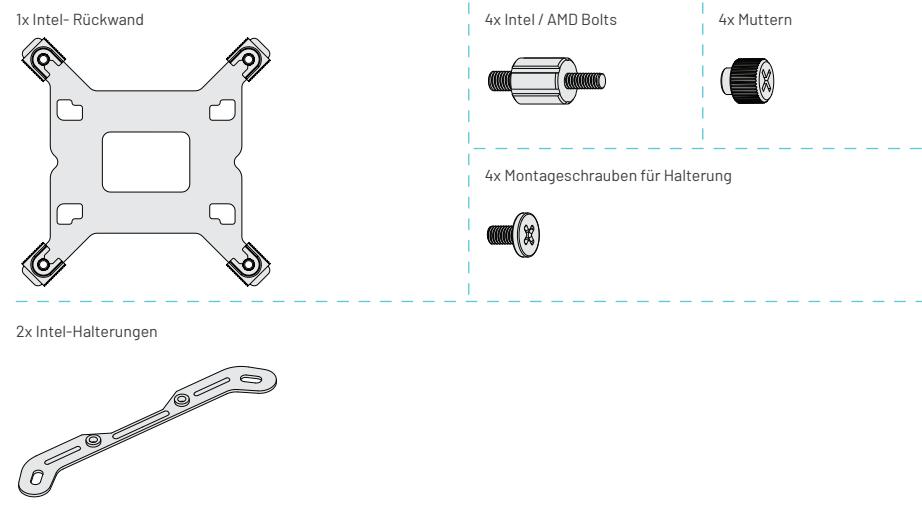

### Schritt 2: Kühlkörper montieren

Verwenden Sie die Kühlkörperschrauben, um den Kühlkörper am Gehäuse zu befestigen.

## DE Intel LGA1200/1700 Montage

Wir haben die für die Montage der Plattform Intel LGA1200/1700 erforderlichen Teile für Sie markiert.

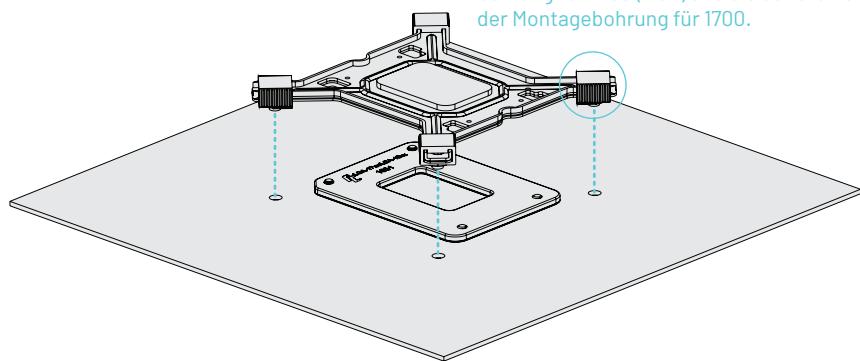

### Schritt 1: Rückwand montieren

1. Richten Sie die Rückwand an den entsprechenden Plattformlöchern aus.
2. Montieren Sie die Rückwand auf der Rückseite der Hauptplatine.

\* Sie können sie verschieben, um sie an die entsprechenden Löcher der Plattform anzupassen.

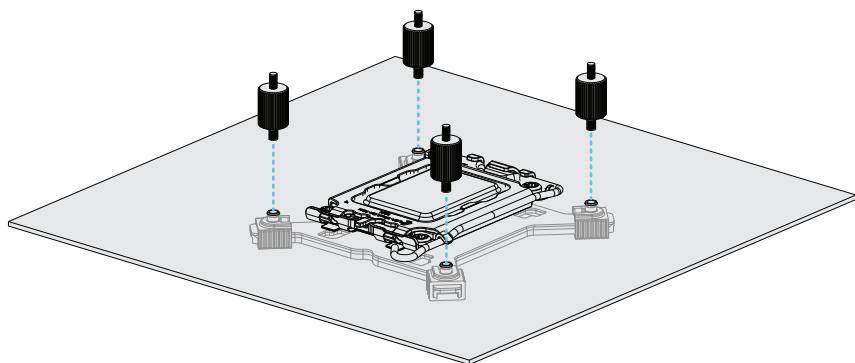

\* Verwenden Sie die innere Position der Montagebohrung für 1200 (115X) und die äußere Position der Montagebohrung für 1700.

### Schritt 2: Schrauben montieren

Montieren Sie die Intel-/AMD-Bolzen auf der Hauptplatine.

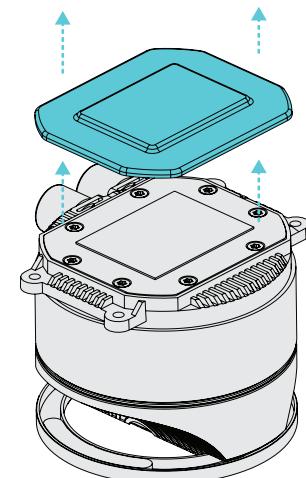

\* Das größere Ende der Schraube zeigt nach unten.

### Schritt 3: Schutzabdeckung entfernen

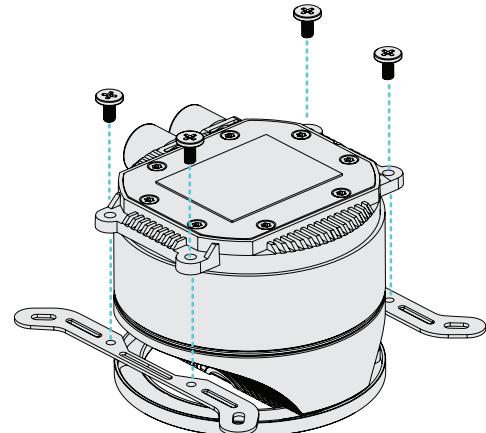

Entfernen Sie die Schutzabdeckung von der Kühlplatte.

\* Es ist entscheidend für die Kühlleistung.

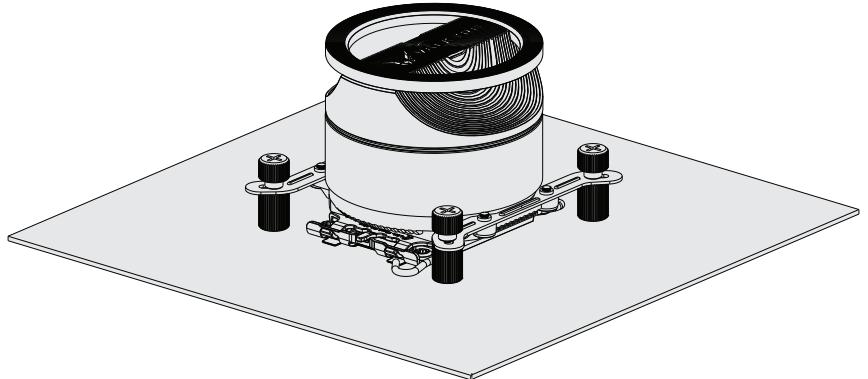

**DE Schritt 4: Halterung montieren**

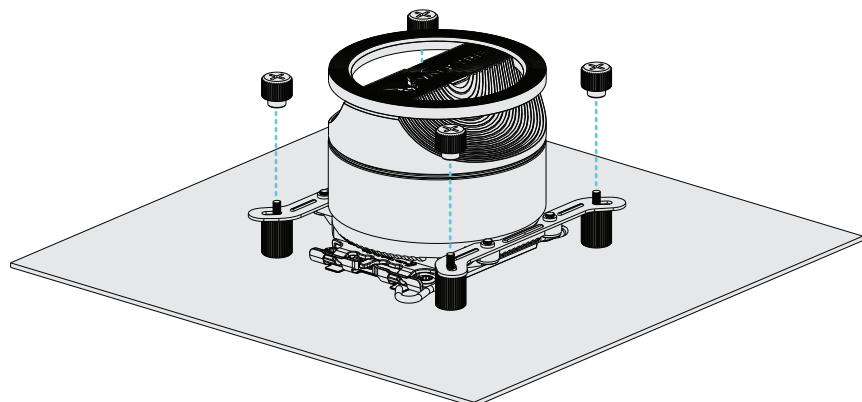

Verwenden Sie die Halterungsschrauben, um die Halterung am Wasserblock zu montieren.

**Schritt 6: Montage abschließen**

Informationen zur Verkabelung sind im Abschnitt „Verkabelung“ enthalten.

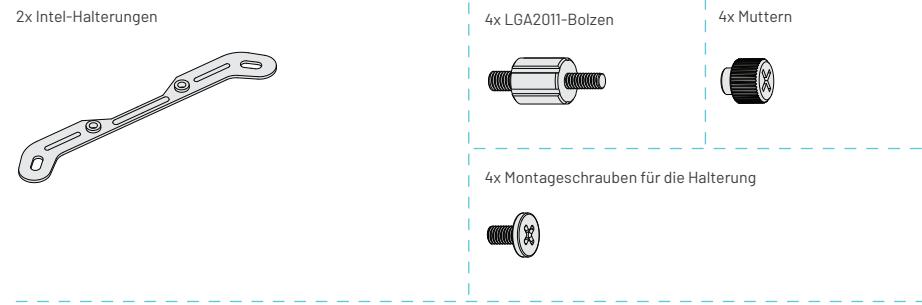

**Schritt 5: Wasserblock montieren**

Stecken Sie den Wasserblock auf die Bolzen und befestigen Sie ihn mit Muttern.

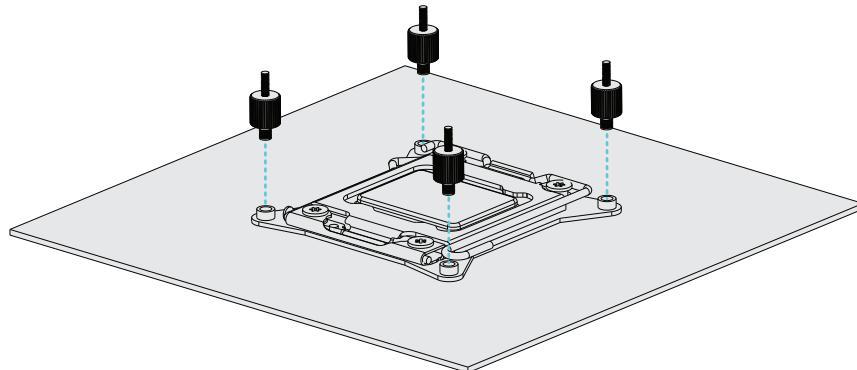

## DE Intel LGA2011/2066 Montage

Wir haben die für die Montage der Intel LGA2011/2066 Plattform benötigten Teile für Sie markiert.

Informationen zur Verkabelung sind im Abschnitt „Verkabelung“ enthalten.

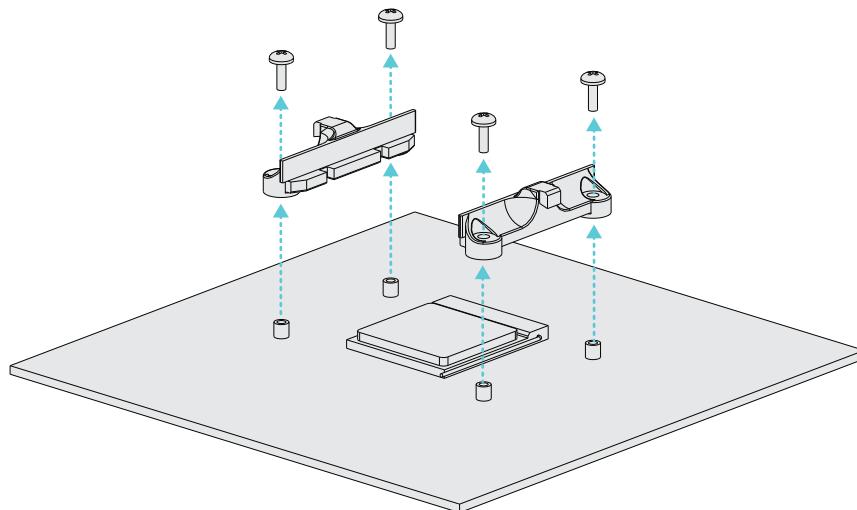

## DE AMD AM4/AM5 Montage

Nous avons marqué les pièces nécessaires à l'assemblage de la plate-forme AMD AM4/AM5 pour votre commodité.

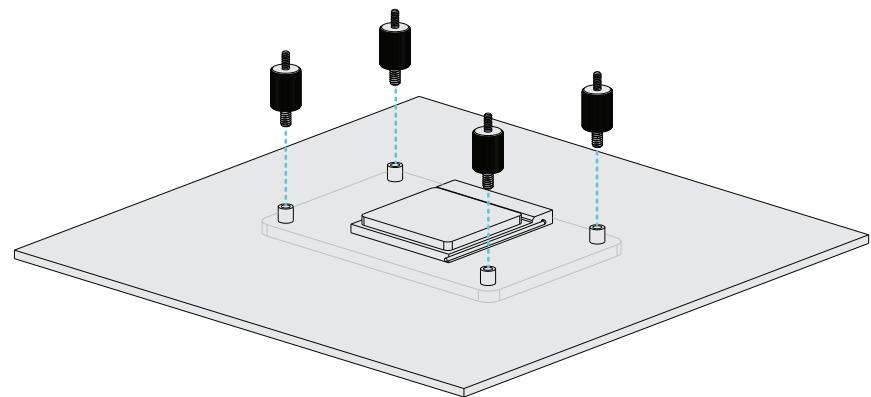

### Schritt 1: Hauptplatine vorbereiten

Lösen Sie die 4 Bolzen. Entfernen Sie die Originalhalterung auf der Hauptplatine. Bewahren Sie die Original-Rückwand auf.

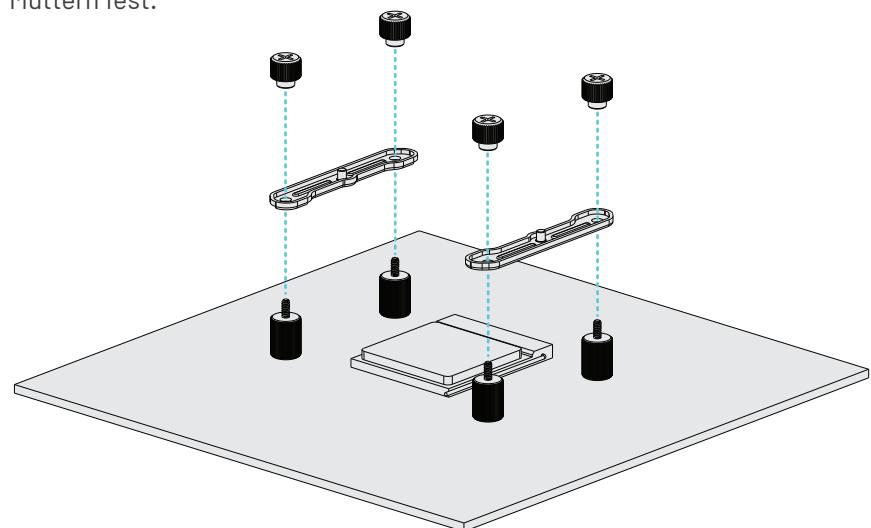

### Schritt 2: Schrauben montieren

Montieren Sie die Intel-/AMD-Bolzen auf der Hauptplatine.  
\*Das größere Ende der Schraube zeigt nach unten

### Schritt 3: Halterungen montieren

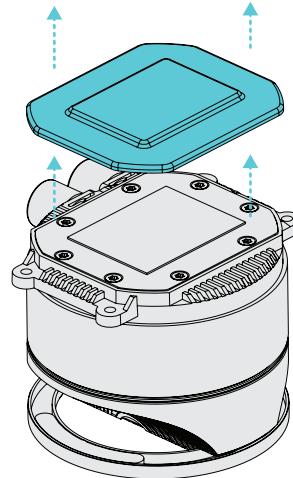

Setzen Sie die AMD-Halterungen auf die Schrauben und ziehen Sie sie mit den Muttern fest.

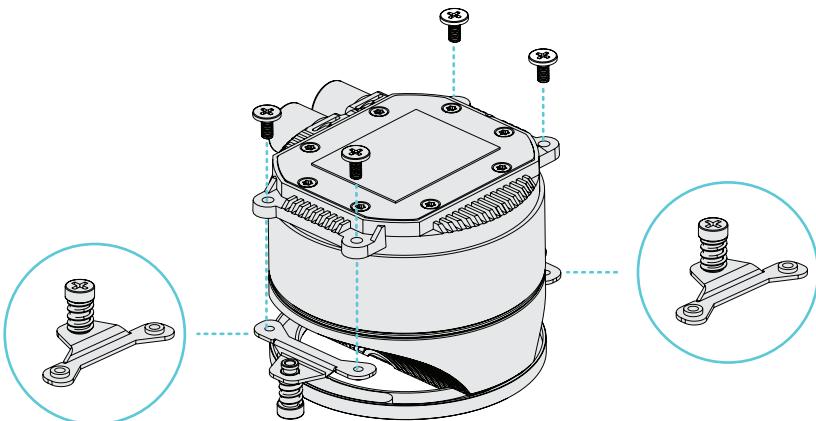

**DE Schritt 4: Schutzabdeckung entfernen**

Entfernen Sie die Schutzabdeckung von der Kühlplatte.

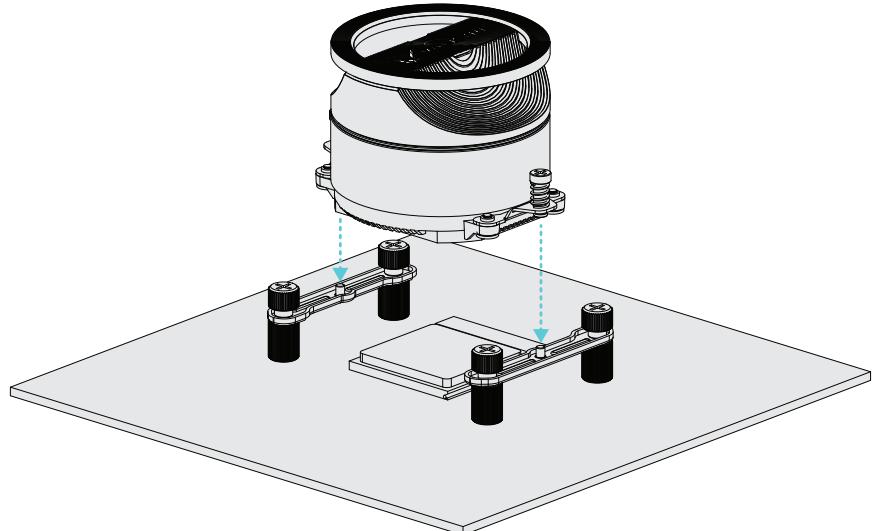

\*Sie ist entscheidend für die Kühlleistung.

**Schritt 5: AMD-Befestigung montieren**

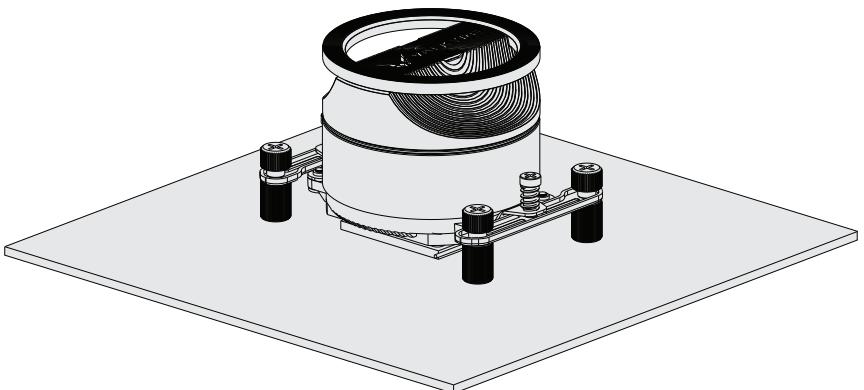

Verwenden Sie Halterungsbolzen, um die AMD-Befestigung am Wasserblock zu montieren.

**Schritt 6: Wasserblock montieren**

Richten Sie die Halterung an den Löchern aus und ziehen Sie die Federschrauben an beiden Enden fest.

**Schritt 7: Montage abschließen**

Informationen zur Verkabelung sind im Abschnitt „Verkabelung“ enthalten.

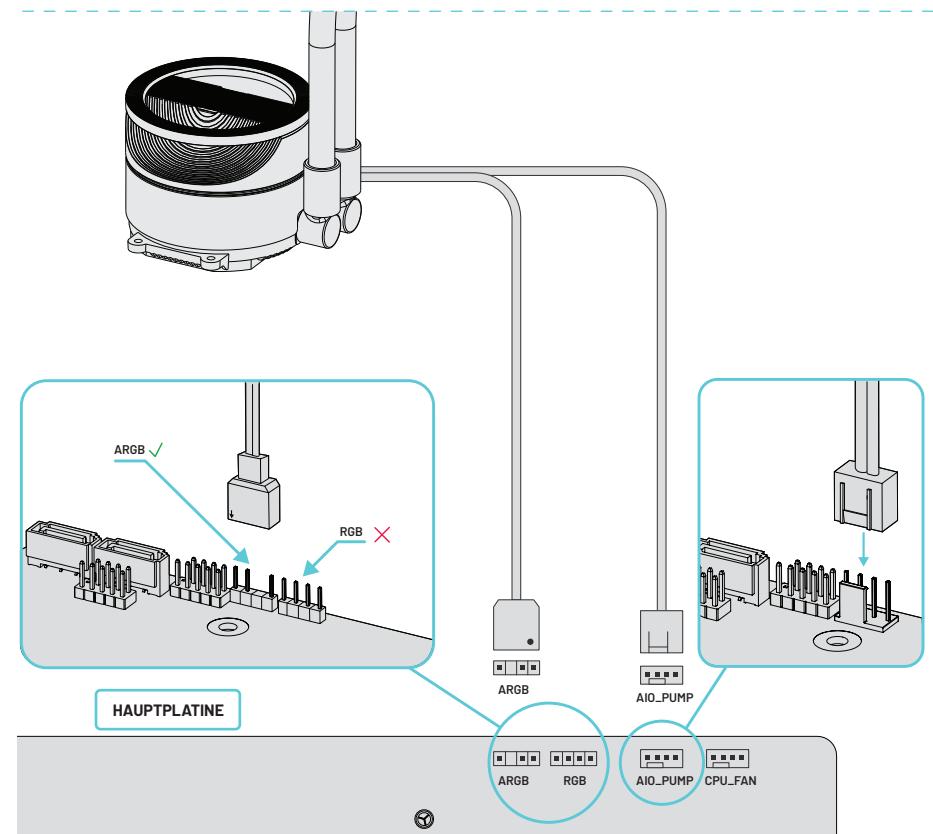

# VERKABELUNG

## Verbinden des Wasserblocks mit der Hauptplatine

1. Verbinden Sie den 4PIN-Stecker der Wasserpumpe mit dem AIO\_PUMPE-Anschluss auf der Hauptplatine.
2. Stecken Sie den A-RGB-Stecker des Wasserblocks in den A-RGB-Anschluss auf der Hauptplatine.

\* Wenn es nur einen A-RGB-Anschluss auf der Hauptplatine gibt, kann der A-RGB-Stecker des Wasserblocks.

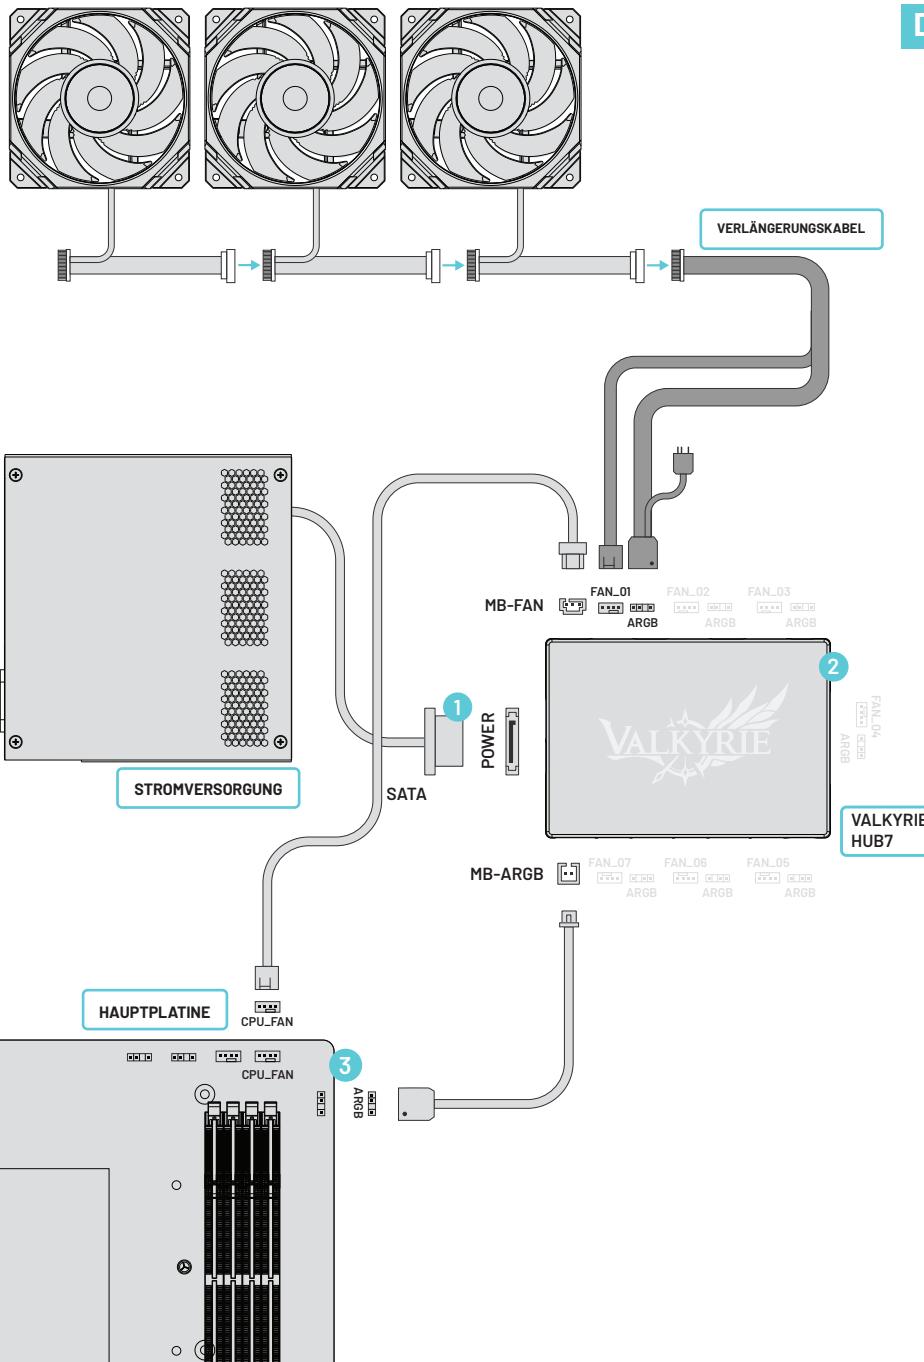

## DE Valkyrie HUB Verkabelung

1. Stecken Sie den Stecker der SATA-Stromversorgung in den Stromanschluss des Valkyrie HUB.

2. Stecken Sie die 4PIN-Lüfterstecker und die ARGB-Stecker jeweils in den Valkyrie HUB.\*

3. Verbinden Sie die Steuerkabel des Valkyrie HUB mit dem MB\_LÜFTER- bzw. MB\_ARGB-Anschluss und stecken Sie die anderen Enden in die CPU\_LÜFTER- und ARGB-Kopfleisten auf der Hauptplatine.

\*Der LÜFTER\_01(rot) am VK HUB7 muss mit einem 4PIN-Lüfterstecker eingesteckt werden.

Utilizzare le viti del radiatore per fissare il radiatore al telaio.

# IT Intel LGA1200/1700 Installation

Abbiamo contrassegnato le parti necessarie per l'installazione della piattaforma Intel LGA2011/2066.

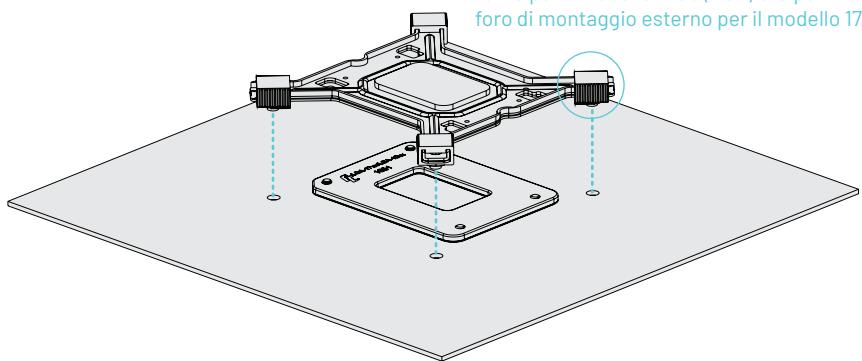

## Passo 1: Installare la piastra posteriore

1. Allineare la piastra posteriore ai fori corrispondenti della piattaforma.
2. Installare la piastra posteriore sul retro della scheda madre.

\*Si può far scorrere per regolare l'allineamento con i fori corrispondenti della piattaforma.

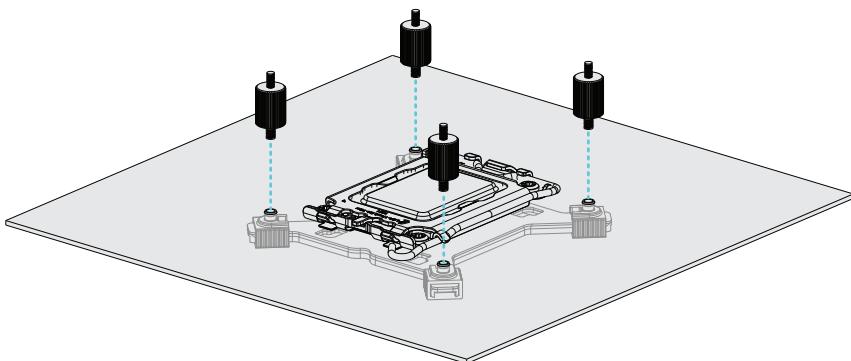

\*Utilizzare la posizione del foro di montaggio interno per il modello 1200 (115X) e la posizione del foro di montaggio esterno per il modello 1700.

## Passo 2: Installare le viti

Installare i bulloni Intel/AMD sulla scheda madre.

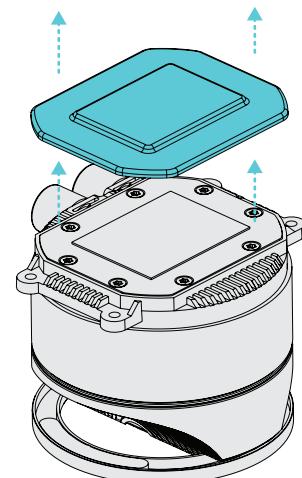

\*L'estremità più grande della vite deve essere rivolta verso il basso.

## Passo 3: Rimuovere il coperchio protettivo

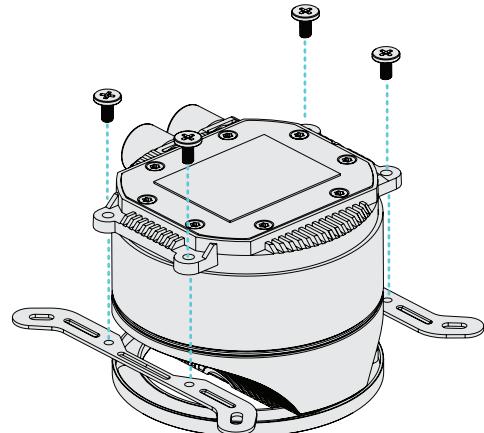

Rimuovere il coperchio protettivo dalla piastra di raffreddamento.

\*Fondamentale per le prestazioni di raffreddamento.

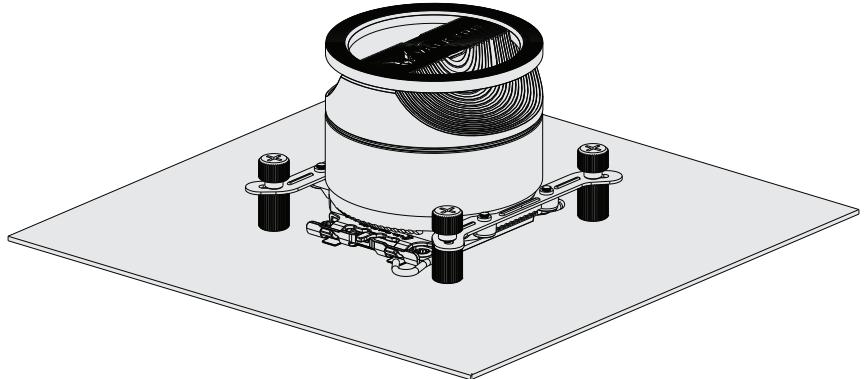

**IT | Passo 4: Installare il supporto**

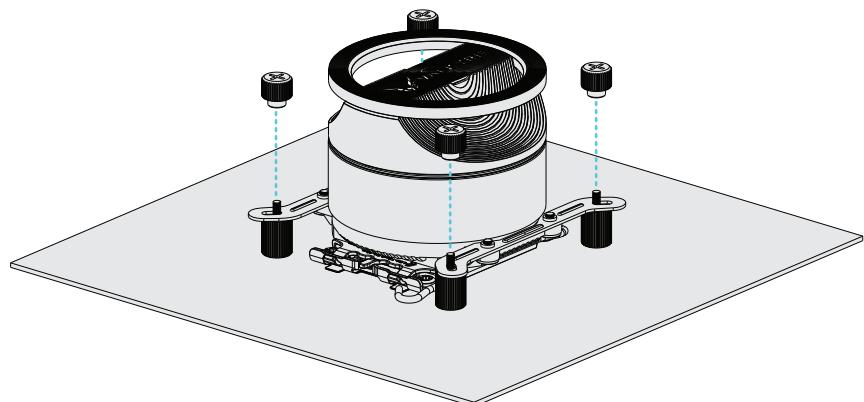

Utilizzare i bulloni del supporto per installarlo sulla valvola di blocco dell'acqua.

**Passo 6: Completare l'installazione**

Per il cablaggio, consultare la sezione "Cablaggio".

**Passo 5: Installare la valvola di blocco dell'acqua**

# CABLAGGIO

## Collegamento della valvola di blocco dell'acqua alla scheda madre

1. Collegare il connettore a 4 poli della pompa dell'acqua al terminale AIO\_PUMP della scheda madre.
2. Collegare il connettore A-RGB della valvola di blocco dell'acqua al terminale A-RGB della scheda madre.

\*Se sulla scheda madre è presente un solo terminale A-RGB, il connettore A-RGB della valvola di blocco dell'acqua può essere collegato all'HUB Valkyrie.

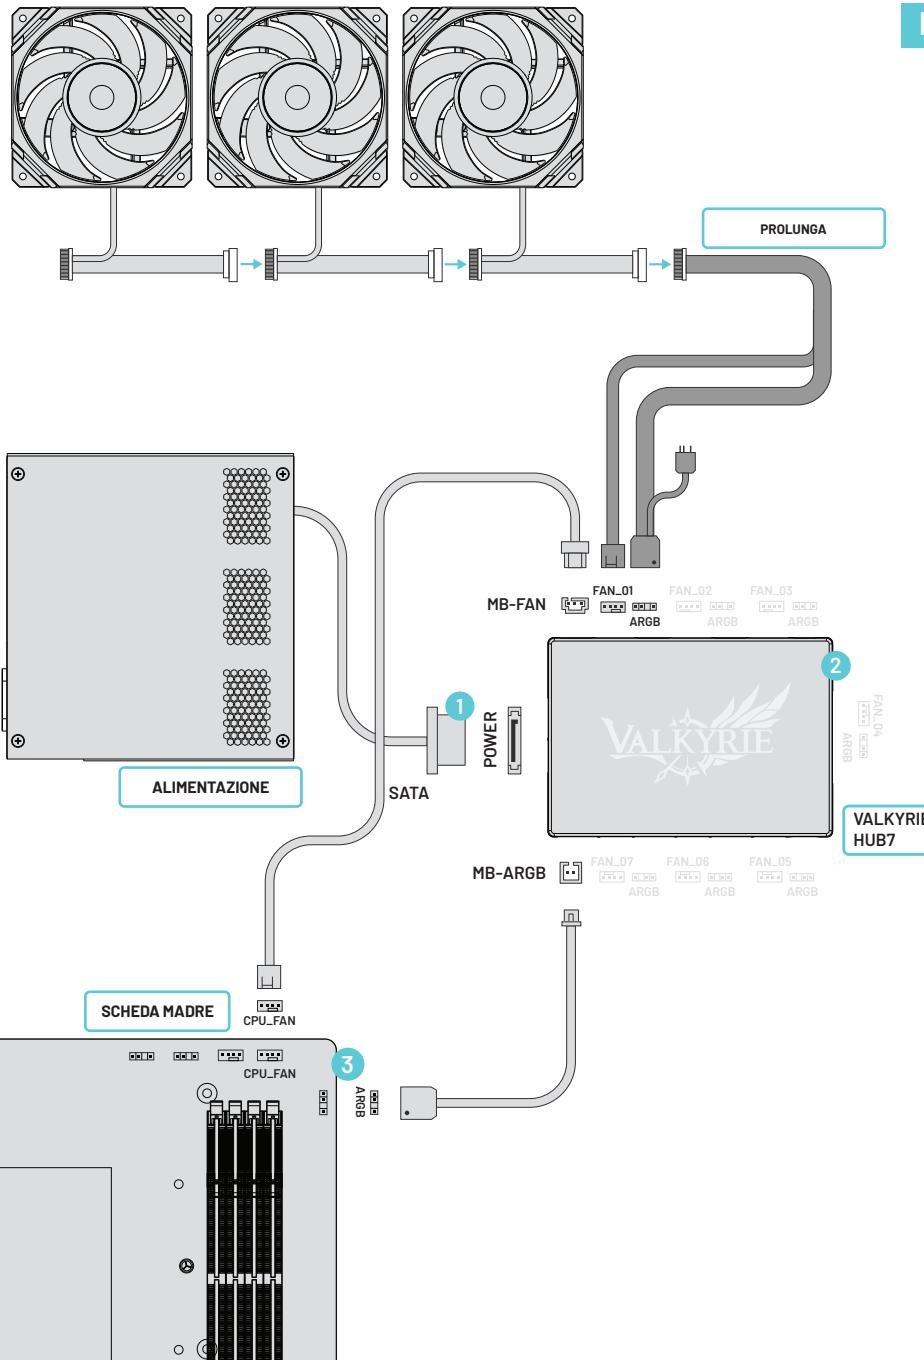

## IT Cablaggio dell'HUB Valkyrie

1. Inserire il connettore dell'alimentatore SATA nella porta di ALIMENTAZIONE dell'HUB Valkyrie.

2. Inserire i connettori a 4 poli della ventola e i connettori ARGB rispettivamente nell'HUB Valkyrie.\*

3. Collegare i cavi di controllo dell'HUB Valkyrie rispettivamente alle porte MB\_FAN e MB\_ARGB e collegare le altre estremità ai terminali CPU\_FAN e ARGB sulla scheda madre.

\*La VENTOLA\_01(rossa) sul VK HUB7 deve essere collegata a un connettore per ventole a 4 poli.

## Instalación del radiador

### Paso 1: instale el ventilador

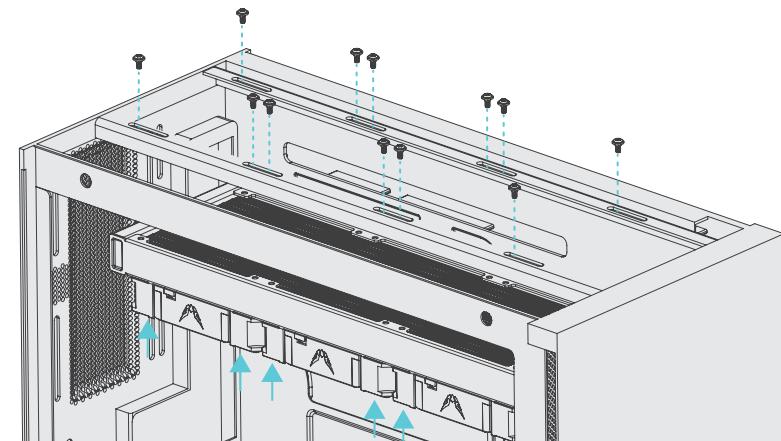

Utilice los tornillos del ventilador para fijar este al radiador.

\*Utilice los tornillos del ventilador más cortos. NO utilice tornillos ampliados para fijar el ventilador de refrigeración.

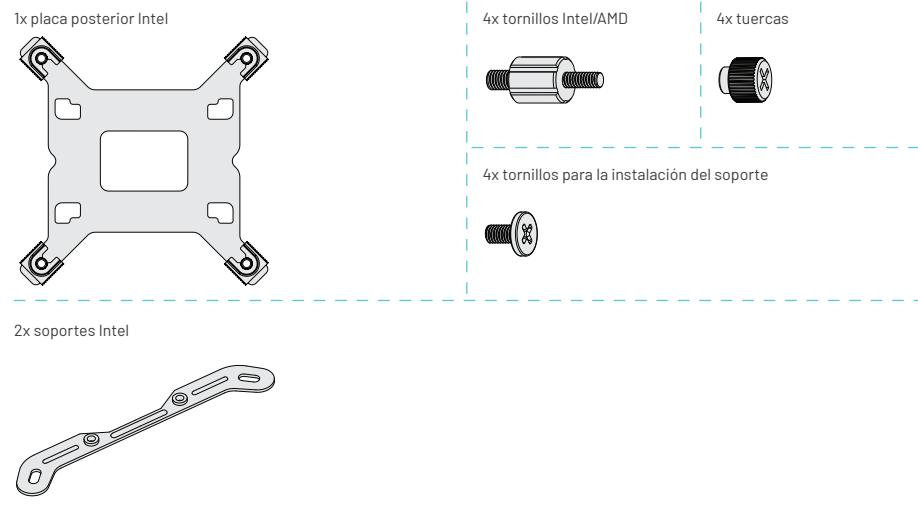

### Paso 2: instale el radiador

Utilice los tornillos del radiador para fijar este a la carcasa.

## ES Instalación de Intel LGA1200/1700

Hemos marcado para usted las piezas necesarias para instalar la plataforma LGA1200/1700.

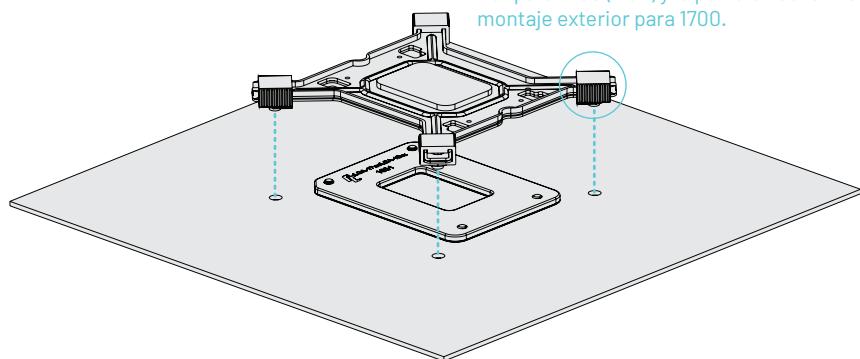

### Paso 1: instale la placa posterior

1. Alinee la placa posterior con los orificios de la plataforma correspondientes.
2. Instale la placa posterior en la parte posterior de la placa base.

\* Puede deslizarla para alinearla con los orificios correspondientes de la plataforma.

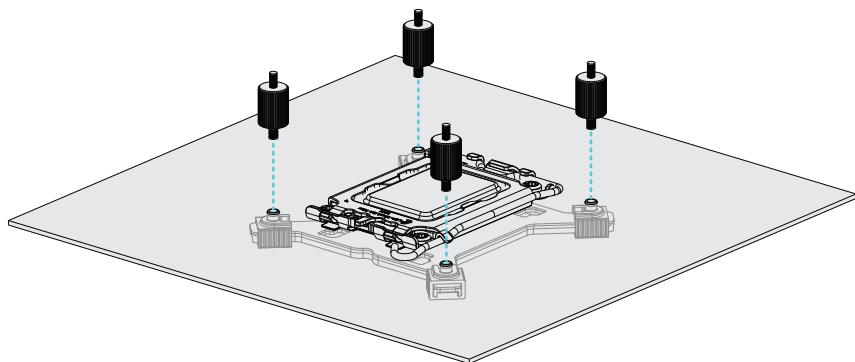

\* Utilice la posición del orificio de montaje interior para 1200 (115X) y la posición del orificio de montaje exterior para 1700.

### Paso 2: introduzca los tornillos

Instale los tornillos Intel/AMD en la placa base.

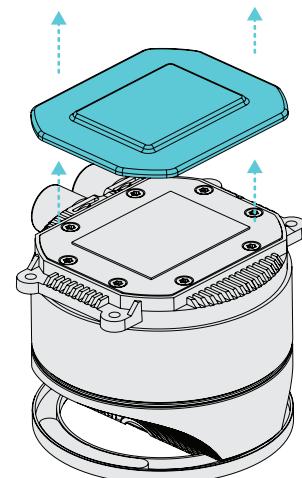

\* El extremo más largo del tornillo mira hacia abajo.

### Paso 3: retire la cubierta protectora

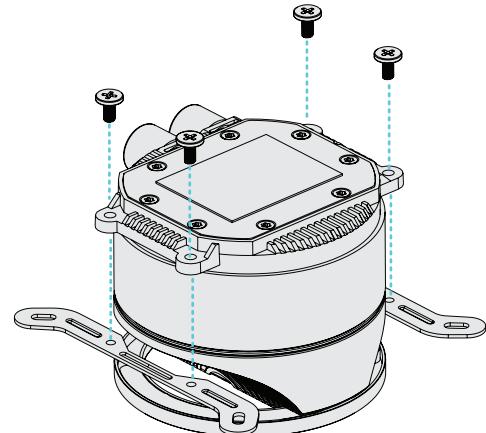

Retire la cubierta protectora de la placa fría.

\* Esto es fundamental para un buen rendimiento de refrigeración.

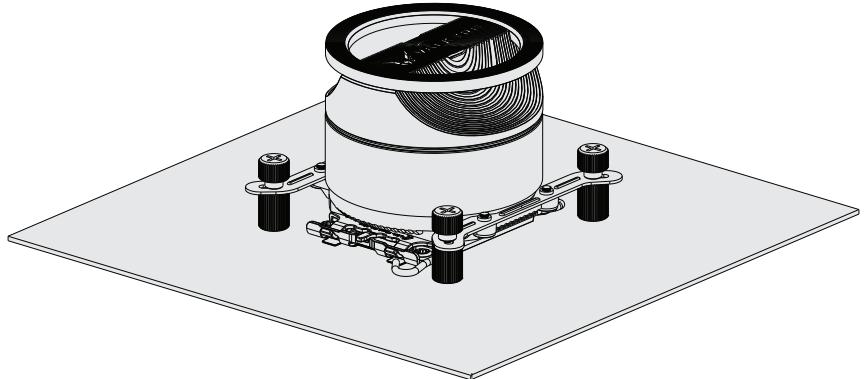

**ES** **Paso 4: instale el soporte**

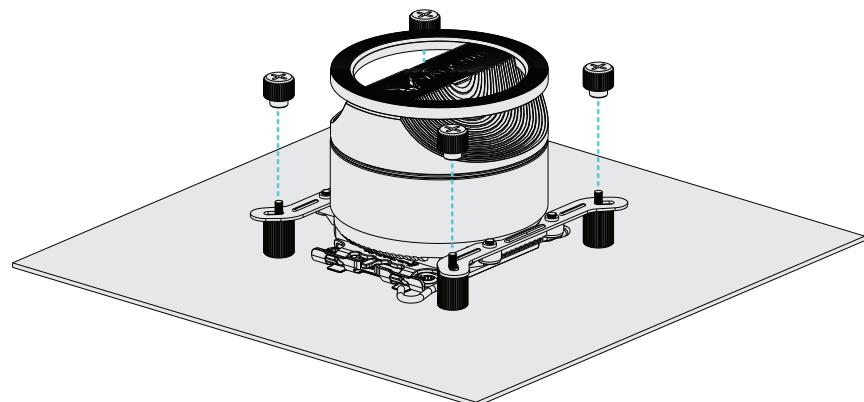

Utilice los tornillos de soporte para instalar el soporte en el bloque de agua.

**ES** **Paso 6: instalación finalizada**

Consulte el punto de “Cableado” para el cableado.

**Paso 5: instale el bloque de agua**

Coloque el bloque de agua en los tornillos y use tuercas para fijarlo.

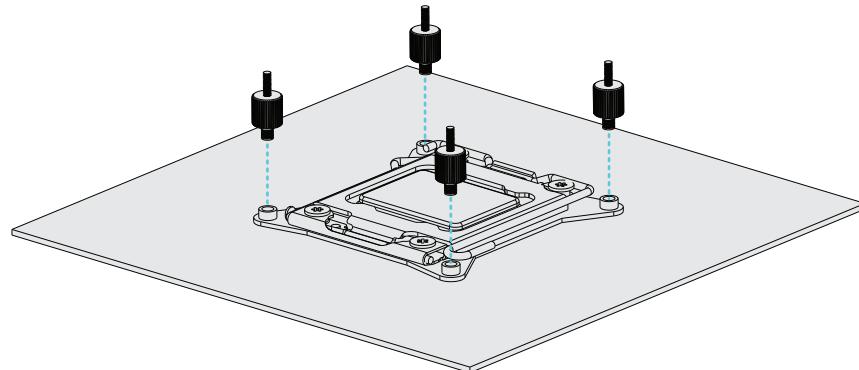

## ES Instalación de Intel LGA2011/2066

Hemos marcado para usted las piezas necesarias para instalar la plataforma LGA2011/2066.

### Paso 1: introduzca los tornillos

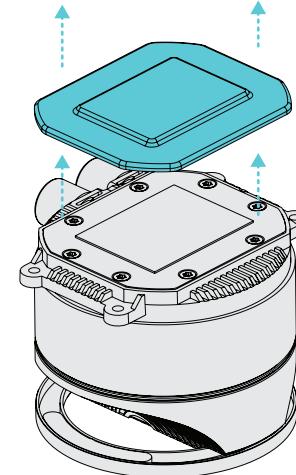

Instale los tornillos Intel LGA2011 en la placa base.

### Paso 2: retire la cubierta protectora

**ES** **Paso 4: instale el bloque de agua****ES**

Coloque el bloque de agua en los tornillos y use tuercas para fijarlo.

**Paso 5: instalación finalizada**

Consulte el punto de "Cableado" para el cableado.

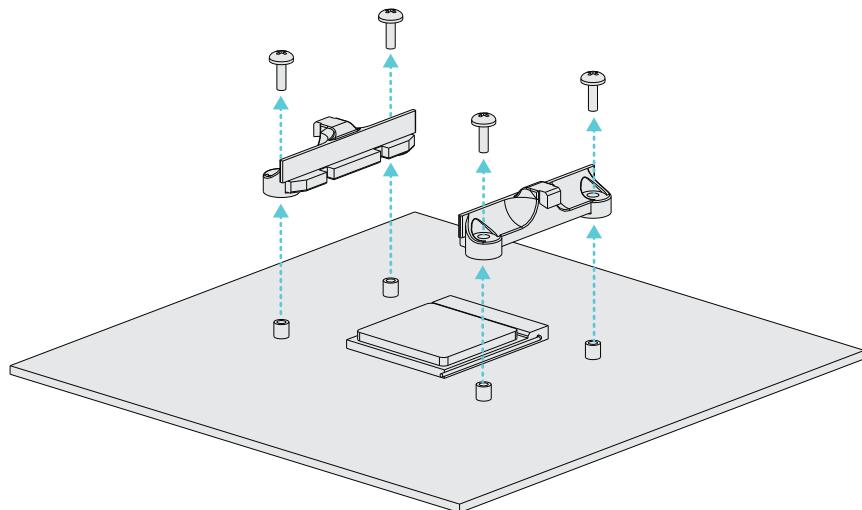

## ES Instalación de AMD AM4/AM5

Hemos marcado para usted las piezas necesarias para instalar la plataforma AMD AM4/AM5.

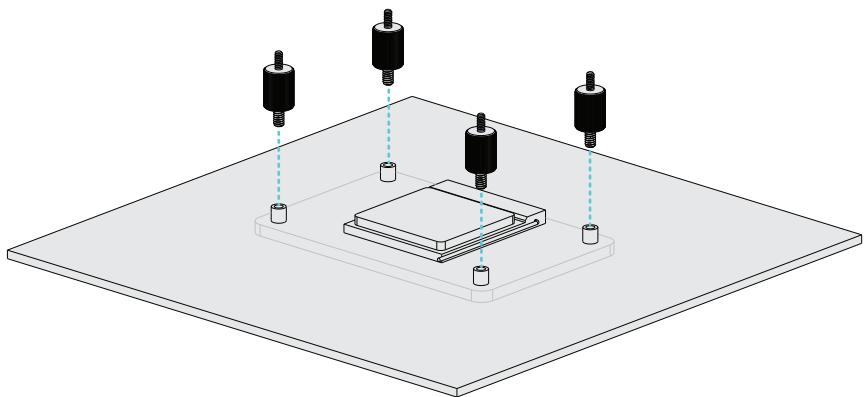

### Paso 1: prepare la placa base

Atornille los 4 tornillos. Retire el soporte original de la placa base. Guarde la placa posterior original.

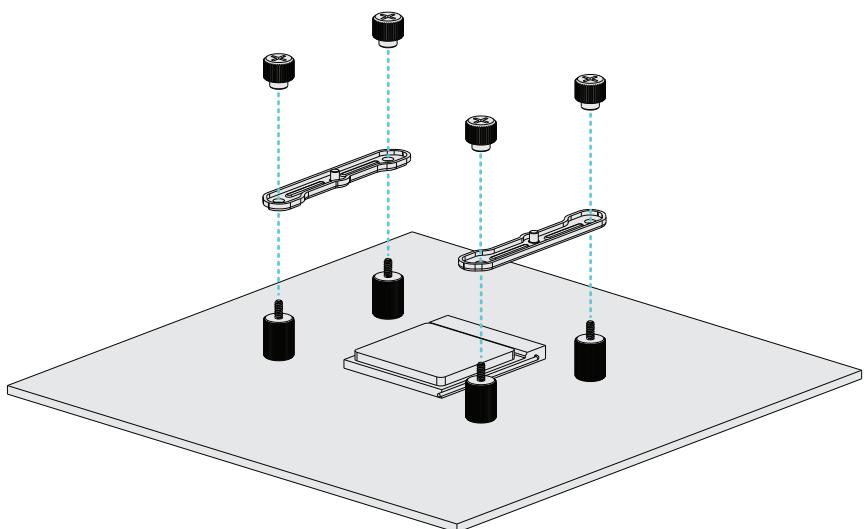

### Paso 2: introduzca los tornillos

Instale los tornillos Intel/AMD en la placa base.  
\*El extremo más largo del tornillo mira hacia abajo

### Paso 3: instale los soportes

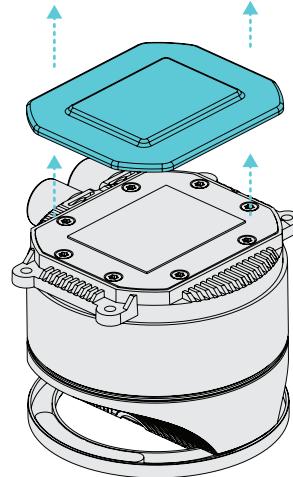

Instale los soportes AMD en los tornillos y apriételos con tuercas.

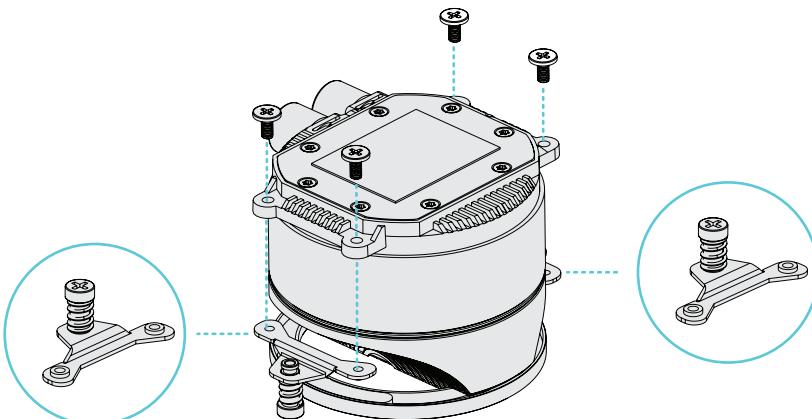

**ES | Paso 4: retire la cubierta protectora**

Retire la cubierta protectora de la placa fría.

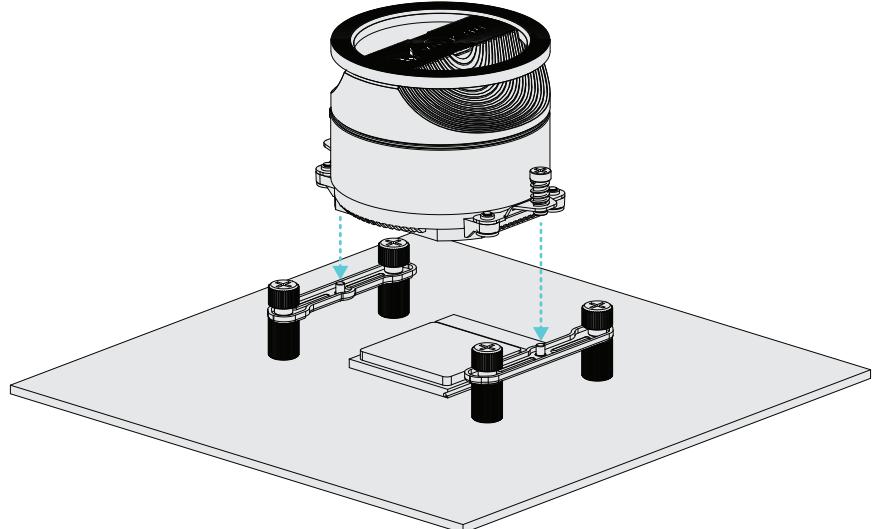

\*Esto es fundamental para el rendimiento de refrigeración.

**Paso 5: instale el fijador AMD**

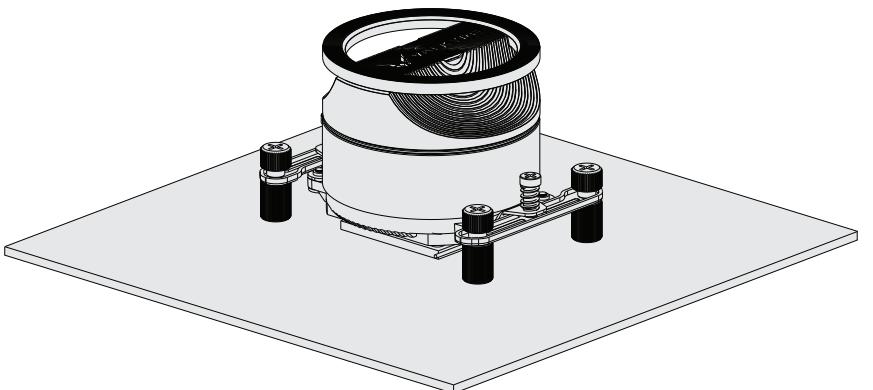

Utilice tornillos de soporte para instalar el fijador AMD en el bloque de agua.

**Paso 6: instale el bloque de agua**

Alinee el soporte con los orificios y apriete los tornillos de muelle en ambos extremos.

**Paso 7: instalación finalizada**

Consulte el punto de "Cableado" para el cableado.

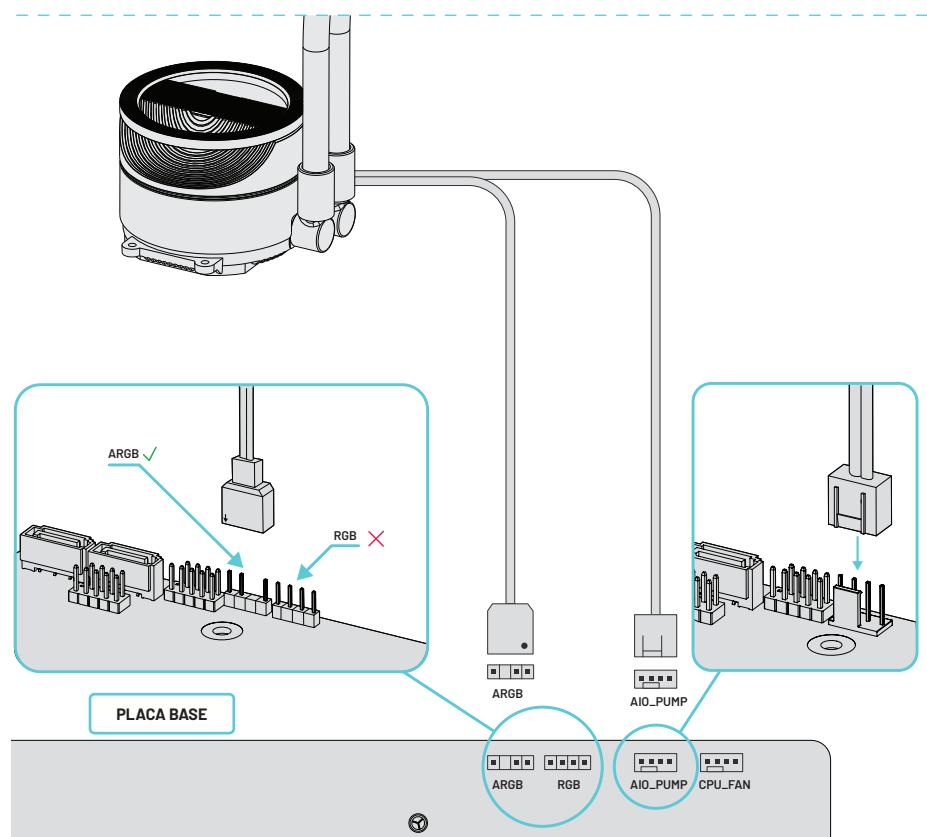

# CABLEADO

## Conectar el bloque de agua a la placa base

ES

1. Conecte el conector de 4PIN de la bomba de agua en el cabezal AIO\_PUMP.
2. Enchufe el conector A-RGB del bloque de agua en el cabezal A-RGB.

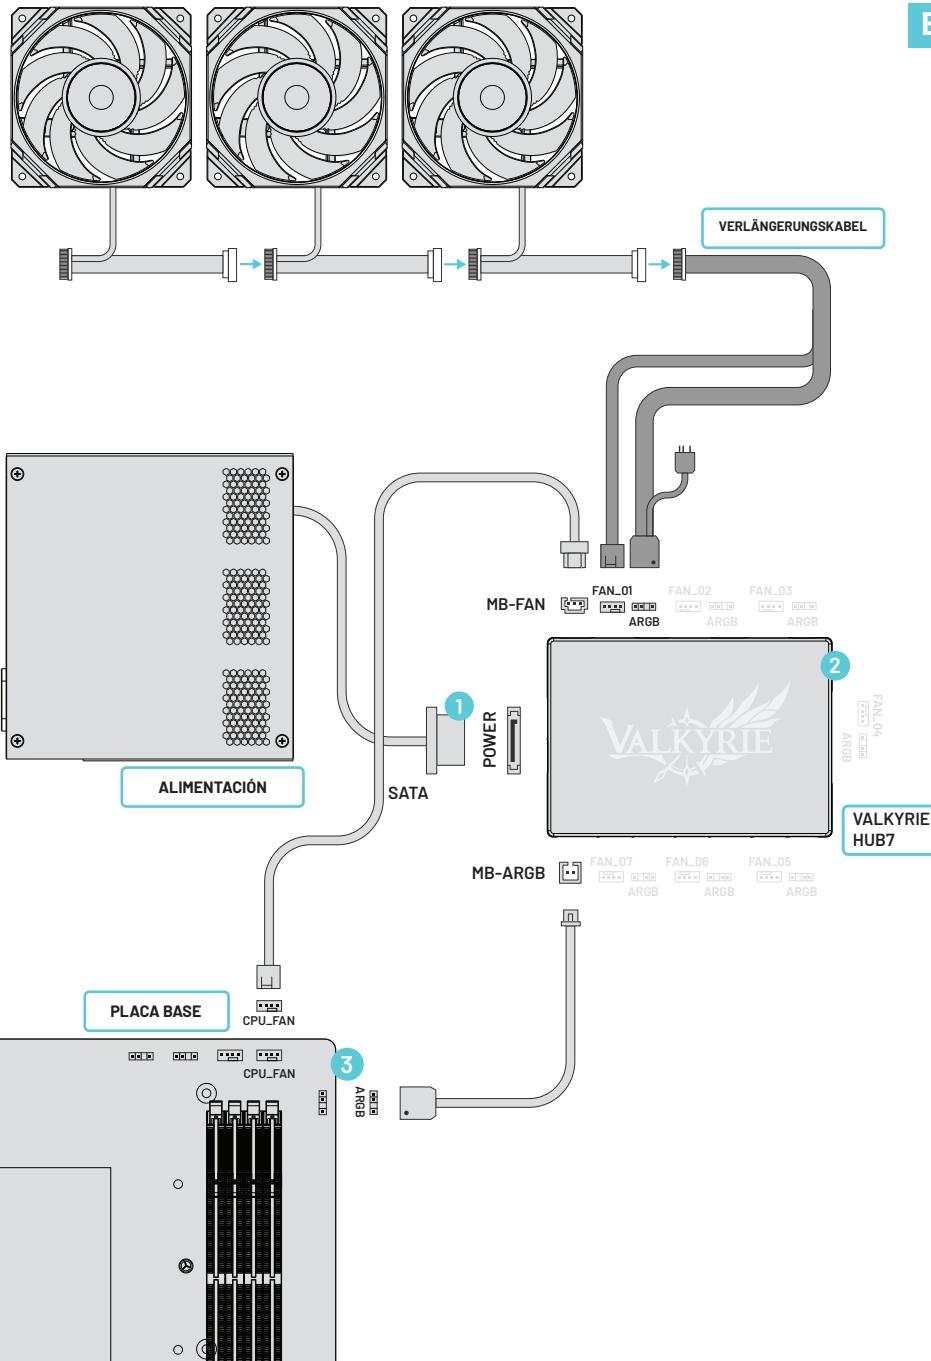

\* Si solo hay un encabezado A-RGB en la placa base, el conector A-RGB del bloque de agua puede estar conectado al Valkyre HUB.

## ES Cableado Valkyrie HUB

1. Enchufe el conector de la fuente de alimentación SATA en el puerto de ALIMENTACIÓN de Valkyrie HUB.
2. Enchufe los conectores de ventilador 4PIN y los conectores ARGB en el Valkyrie HUB, respectivamente.\*
3. Conecte los cables de control de Valkyrie HUB a los puertos MB\_FAN y MB\_ARGB respectivamente y conecte los otros extremos a los cabezales CPU\_FAN y ARGB en la placa base.

\*El FAN\_01(rojo) en el VK HUB7 debe conectarse con un conector de ventilador 4PIN.
